

Stay healthy through the cold and flu season with medisana's quality products:

TM 750 infrared multi-functional thermometer and IR 850 infrared lamp

Neuss, 22.02.2022. In recent times we have been constantly reminded that our health is our most precious commodity. Especially in winter, it is important to get through the cold and flu season in as good health as possible and to fight off viruses, bacteria and common colds. medisana, one of the leading specialists in the home healthcare market, offers an extensive range of health products to help with this.

One indispensable tool for home health management is a reliable clinical thermometer – such as the medisana **TM 750 infrared multi-functional thermometer**, which was awarded the "Good" (2.2) quality rating by Stiftung Warentest. It delivers precise body temperature readings within seconds, both on the forehead and in the ear. It can also be used to take readings of the ambient temperature, liquids and surfaces (0-100°C). The TM 750 infrared multi-functional thermometer did particularly well in the Stiftung Warentest's "measurement accuracy" and "ease of use" categories, in both of which it received the "Good" (1.9) quality rating. As a certified medical device, the TM 750 is always subject to strict requirements, regular controls and comprehensive quality criteria. The optical fever alarm is particularly practical for signalling high temperatures. The TM 750 indicates whether the user's temperature is normal or high by changing colour: green means that your temperature is normal, while red represents a fever. In addition, an acoustic signal sounds when the thermometer is ready to measure and when measurement is complete. The thermometer automatically stores the last 30 readings. Coupled with its modern design and practical storage bag, it really is a reliable helper for the whole family.

Soothing infrared lamps, such as the **IR 850 infrared lamp from medisana**, are also very popular for treating all kinds of colds. The deeply penetrating warmth of intense infrared light not only does you good, it also promotes circulation, stimulates the metabolism and relieves muscular tension. It can also alleviate pain and help in the treatment of colds. By stimulating

the metabolism, the lamp strengthens the body's own defences and accelerates its healing processes. As a certified medical product, the medisana IR 850 infrared lamp can be used to relax the muscles or to treat colds. The intense 300-watt infrared light boosts circulation and alleviates pain. The IR 850 infrared lamp is made from ceramic glass, which reliably guarantees that one hundred percent of harmful UV rays are blocked. The lamp's round design and adjustable tilting angle from -15° to +35° degrees allow users to focus the infrared light on the area they wish to treat. The lamp's features are rounded off with a three-stage electronic timer (5, 10 or 15 minutes) and an LED screen.

The TM 750 infrared multi-functional thermometer is available in specialist retail stores and at www.medisana.de for the price of € 49.95 RRP. The IR 850 infrared lamp is available from the same outlets for the price of € 109.95 RRP.
